

Knowbella Tech and doDOC™ Partner to Integrate doDOC™ Content Management System Platform into Knowbella Platform™.

Innovative manuscript development tool to be integrated into scientific collaboration platform.

Cincinnati, OH and Boston, MA – June 26, 2018 - Knowbella Tech LLC, a scientific collaboration platform company, and doDOC, a document creation and management tool company, have partnered. Knowbella Platform™ will freely provide its scientific users with the doDOC scientific manuscript development tool.

According to Mark Pohlkamp, CEO of Knowbella Tech, “The Knowbella Tech scientific collaboration platform is being designed to provide researchers an end-to-end scientific ecosystem experience. After providing scientists with free non-therapeutic intellectual properties to collaborate around, it is important to enable those researchers to develop manuscripts they can submit to our preprint server so open access journals can review them for publication”.

According to Federico Cismondi, CEO of doDOC, “doDOC is helping researchers collaborate with scientific manuscripts in a way they have never experienced before. doDOC enable teams to work together on the same documents at the same time, drastically accelerating the authoring and review processes. With doDOC, scientists can write documents with the highest complexity of contents, seamlessly using citations from several

popular repositories like Mendeley, PubMed, Scopus and EndNote. Our partnership with Knowbella Tech is aligned with our vision to define the next generation of scientific collaboration platforms, with complete focus on science development, high-quality content and value.”

The Knowbella Platform™ alpha version is scheduled for release within sixty days. More information will be provided at that time.

About Knowbella Tech LLC

Its mission is crowdsourcing the global scientific community around orphan and dormant intellectual properties to advance science and generate a public good. The freely available Knowbella Platform that will result from a successful SEC-compliant Securities Token Offering (STO) will enable scientists to collaborate around advancing technologies. Scientists will be rewarded for their conduct of science within the Platform with Helix™, “The Currency of Science™.”

About doDOC Corp.

doDOC’s mission is to change the way that complex documents are produced, from draft to publishing. Scientific documents are among the most complex ones due to their contents and strict layout design. With doDOC, scientists not only save time, but they also produce higher quality of publications due to an open channel for collaboration with their colleagues, full traceability and control of their actions, and a virtually infinite library of citations and layouts following journals specifications. doDOC is a powerful and flexible cloud-based software, scaled to meet the needs of any business, from startups to global companies.
